

## DECLARATION OF COMPLIANCE DIRECTIVE 94/62/EC

We hereby state that all Paper and Solid Board grades intended for packaging produced by SOLIDUS SOLUTIONS Board B.V. comply with the "Essential requirements" of Directive 94/62/EC on Packaging and Packaging Waste and its amendments.

### Source reduction – Heavy metals

We hereby state that all Paper and Solid Board grades intended for packaging produced by SOLIDUS SOLUTIONS Board B.V. comply with the requirement for heavy metals as drawn up in the European Council Directive 94/62/EC on Packaging and Packaging Waste (completed by EN 13428 & CR 13695 parts 1 & 2):

- Lead, Cadmium, Mercury and hexavalent Chromium have not been intentionally introduced during the manufacture of these papers.
- The sum of the concentration levels of lead, cadmium, mercury and hexavalent chromium present in these papers does not exceed 100 parts per million by weight.

### Source reduction – Minimization of Hazardous substances

In particular, all Paper and Solid Board grades intended for packaging are so manufactured by SOLIDUS SOLUTIONS Board B.V. that the presence of noxious and other hazardous substances and materials as constituents of the packaging material or of any of the packaging components is minimized with regard to their presence in emissions, ash or leakage when packaging or residues from management operations or packaging waste are incinerated or landfilled (EN 13428).

### Recovery

All forms of recovery are key waste management options required by Directive 94/62/EC. Papers are recoverable by the three methods (recycling, energy recovery, and organic recovery) listed in the Directive to satisfy the Essential Requirements. Our statement concerning all Paper and Solid Board grades intended for packaging produced by SOLIDUS SOLUTIONS Board B.V. is the following:

- Recovery – Material recycling – (promoted as the preferred option):

All Paper and Solid Board grades intended for packaging that we supply you with is recoverable by material recycling, according to the requirements laid down in EN 13430. Our product ranges have a recyclability rate of 96-100%.

- Recovery – Energy recovery:

The papers that we supply you with can be recovered in the form of energy. The content of organic matter is larger than 50% by weight of the product.

The energy recovery is that described in standard EN 13431, including specification of minimum inferior caloric value.

- Recovery – Biodegradability:

The majority of the Paper and Solid Board grades intended for packaging produced by SOLIDUS SOLUTIONS Board B.V. can be recovered through composting and biodegradation according to EN 13432.
